1 RACE 4
OCEANS
POWERED BY enactus

Project Palaash tackles the problem of **poor waste management** in urban temples by collecting **floral offerings** and using them to **naturally dye** fabrics in a 100% sustainable manner, and providing a stable source of income and employment to rehabilitated victims of human trafficking. **Enactus Aryabhata** has been working hard to advance **SDG 14: Life Below Water** by generating a sustainable, positive impact on the ocean challenges.
