

## Enactus Aryabhata's International Collaborations

Enactus Aryabhata had successfully collaborated with other Enactus teams globally from countries like The United Kingdom and Azerbaijan. With the mutual goal of promoting sustainability and sensitivity towards the environment, Enactus Aryabhata is planning to come up with a collaborative project with other countries across the globe.

We conducted training sessions through e-meet platforms with AzUAC University of Azerbaijan explaining to them the entire process of natural dyeing. The session really enlightened them and would help them to introduce more product lines which involve natural dyeing.

A similar session was conducted with Enactus City College, London. One of their core members visited one of our production centers (Chhatarpur- Project Palaash center) in order to witness and learn natural dyeing. They were interested in incorporating natural dyeing as they run a similar project on promoting sustainable fashion. These initiatives by Enactus Aryabhata have helped people across the globe via spreading of knowledge and making people aware about the issues related to the environment.
