Summary of the event:-

Report on the visit of FIC Aryabhata College to NSE office for an educational workshop.

FIC Aryabhata aims to empower students through knowledge sharing on matters of finance, economics, and geopolitics.

NSE conducts financial education workshops through NSE Academy to develop a new generation of investors. Their expansion initiatives seek to transform India's strong culture of saving into an "equity culture" and introduce more first-time investors to the Indian markets.

The session was conducted by Mr. Kunal Tyagi, an experienced business development manager at NSE. He started off by stating the purpose of NSE and gave us a brief into its history- NSE was incorporated in 1992 and recognised as a stock exchange by SEBI in April 1993 and commenced operations in 1994 by the launch of the wholesale debt market, followed shortly after by the launch of the cash market segment. He emphasized the difference in functioning of trading prior to 1995 when there was an "Open Out Cry System" and how it had become redundant due to its higher risk of manipulation, poor infrastructure, and less transparent ledger system.

He further expanded on the modern structure of NSE with its key features being demutualised exchange structure, SEBI's retailers forward regulations, etc. as well as the NSE Group companies like NSE Clearing which is the backbone for settlement of transactions.

Mr. Kunal emphasized the importance of retail investors and the big scope for India to progress as only 3% of the population is investing as of now. Students were also made aware of the gravity of cyber attacks in this digital era and the importance of the stock exchange of any country being a crucial factor before any foreign investment is made.

Further, many definitions and concepts were touched upon for understanding trading, the types of markets, software like NEAT, what makes the basis of price, trading halt, etc. Students were apprised with newer trading options like Mutual Funds and Gold ETFs as well as investor rights and obligations.

Towards the end of the session, students were familiarized with internship programs and open online programs that can be utilised to increase knowledge about investing and trading.
