

## Event Report

### A WORKSHOP ON SPSS

A workshop on “SPSS” was held on 21<sup>st</sup> April 2023 in Psychology Lab 1. It was attended by 6 faculty members and 19 students. The session was a hands-on training on SPSS to teach demonstrate the execution of statistical techniques like correlation, t tests and regression analysis on sample data that was provided to the students in advance. It was intended that the final year students who were doing dissertation as a part of their curriculum or were working on research, would be able to apply it in the future. The students downloaded the trial version of SPSS and the resource person addressed their doubts individually as well.
